Transform your lawn with Trulawn...

Make the most of your outdoor space

Is your outdoor space going to waste because the grass can't cope with the pressure? If muddy patches and discoloured grass are a familiar sight, and poor-quality grass is preventing you from enjoying your garden the fullest; Trulawn is the perfect solution.

At Trulawn we supply and install soft, durable, extremely realistic artificial grass that can completely transform the way you use your garden. With our grasses you don't have to worry about sowing, mowing or feeding and very little maintenance is required to keep your lawn looking tip top all year round.

We've been installing since 2009, with thousands of lawns across the country upgraded with our grasses. Our teams of experienced and friendly installers work quickly and efficiently to create your dream lawn, with meticulous attention to details to ensure it lasts for many years to come.

We're proud to say all our grasses have the following characteristics:

-  Child friendly
-  No watering
-  Pet safe
-  Quick draining
-  No mowing
-  UV stabilised
-  No mud
-  Durable

Titanium

Our most resilient grass yet, with a dense yarn and double thatch for anti-flattening.

Harmony Plus

Luxurious artificial grass of the future.

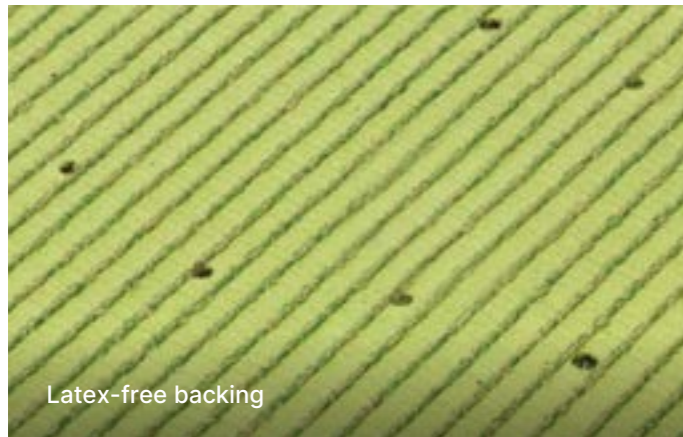

New & Improved Design

Harmony Plus is the next generation of our previous Harmony grass. It's longer, more luxurious and offers an even more authentic look and feel.

Made From Recyclable Plastic

Harmony Plus is made from the same type of plastic throughout, which means the blades and backing do not need separating, and the entire piece could be recycled once it reached its end of life (excluding any joints).

“Harmony Plus’s latex-free backing is a great benefit to pet owners who are trying to avoid urine associated odours.”

Specification

Total Height	39mm [±10%]
Colouring	Forest and lime green, sand and emerald thatch
Yarn Type	Polyethylene & Polypropylene
Total Weight	2024g [±10%]
Roll Width	4m
Roll Length	Approx. 25m
Guarantee	10 Years (UK)

Check with your local recycling centre for disposal advice of artificial grass.

Pooch Plus

Designed with pets in mind.

With Super-Flow Technology!

Odour Prevention

Trulawn Pooch Plus is an advanced form of artificial grass specifically designed with pets in mind. Instead of a standard latex or PU backing made with drainage holes, Pooch Plus is made with super-flow mesh that allows for water to drain through the entire product. This prevents liquids from becoming trapped and much less likely for odours to settle in your grass.

All-round Benefits

Pooch Plus is durable enough to cope with everyday play and use by your pets, with an attractive look and soft feel that can enjoyed in any garden.

“Pooch Plus is the ideal artificial grass for pet owners looking for a quick-draining, low-maintenance, easy to clean lawn.”

Specification	
Total Height	36mm [±10%]
Colouring	Shades of field green, olive green, tan and green rootzone
Yarn Type	Polyethylene & Polypropylene
Total Weight	1987g [±10%]
Roll Width	2 or 4m
Roll Length	Approx. 25m
Guarantee	10 Years (UK)

ProPutt

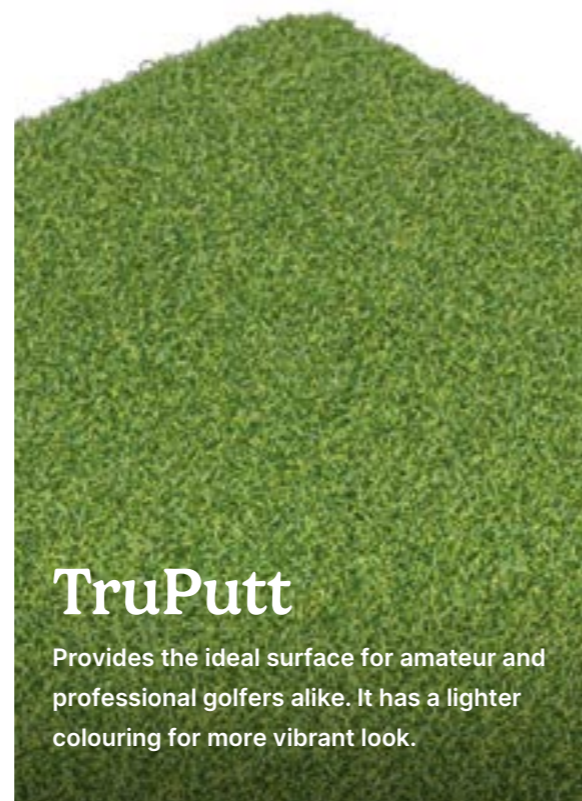

A professional standard putting green that creates a surface that will play smooth and true all year round.

Installing Your Lawn

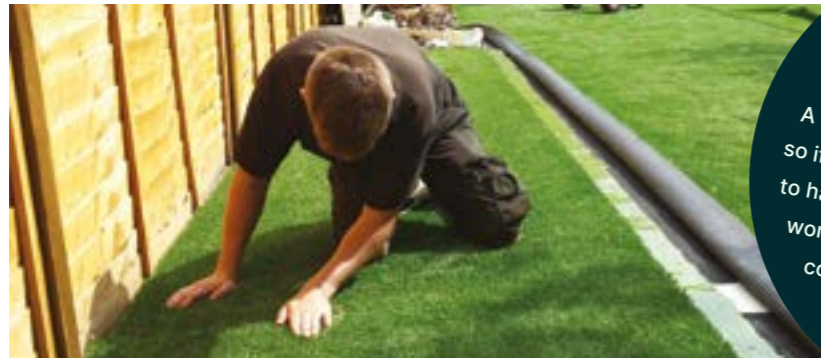

How to Measure Your Lawn

By measuring your lawn we'll be able to provide you with a DIY quote or a ballpark figure for an installation.

There are a few key things to keep in mind:

- 1 Trulawn grass is sold in square metres (width x length = square metres) so measure your lawn in metres for the most accurate calculations.
- 2 Trulawn grass is supplied in 2m or 4m as standard, with 5m widths available on certain grasses. If the width of your lawn exceeds 4m (or 5m) you will need to join more than one piece together.
- 3 When measuring your lawn make sure to take the **widest width** and **longest length** of your lawn to ensure you have enough.
- 4 Pile direction is important for best viewing of the grass. Always lay the grass so that the blades are bending slightly towards you, looking into the pile from your main viewing spot.

Top Tip
 A fence panel is typically 1.8m wide, so if you don't have a tape measure to hand but do have fencing you can work out a rough width or length by counting the number of panels surrounding your lawn!

Installation Accessories

If you've decided to fit your own artificial grass products, we can supply you with the necessary extras to make installing that much easier.

Weedban
Weed Membrane

Tru-Fix
2 Part Adhesive

Tru-Fix Premium
Adhesive Cartridge

Shock Pad
Plus 25 Underlay

Foam Underlay

Jointing Tape

Plastic Edging

Rubber Edging

Our Installation Method

Scan the QR code to see our full process.

To achieve the highest standard of appearance and ensure your artificial grass maximises its life span – a quality installation is essential.

We create a stable draining base as part of your installation, using fully recyclable materials in the process.

Hygiene Accessories

If you've only just completed an artificial grass installation, or have had your artificial lawn for a few years, we recommend a bit of hygiene maintenance to help keep it fresh, clean and in perfect condition throughout the year.

Artificial Grass Cleaner

Trulawn Artificial Grass cleaner restores artificial grass to its usually fresh appearance, whilst also adding a pleasant newly-cut grass fragrance.

Zeolite Artificial Grass Infill

Zeolite is an all-natural granule which absorbs and neutralises pet urine odours before they occur. The granules renew with heavy flow of water, so can be recharged in rainfall or with a hose. Zeolite can be installed as part of the sub-base or used as an infill. Supplied in a 25kg bag, which covers approximately 5sqm.

Want to preserve that freshly laid lawn feeling?

Trulawn Refresh is our professional treatment designed to refresh, rejuvenate, and root out that tough to reach dirt that normal home maintenance efforts might miss.
